Suede/Cordura® **Climate 6**

OpsTactical®

Climate 6

Suede/Cordura®

- 1 Padded collar with calf curvature to assist lower leg leverage.
- 2 Structural ankle support.
- 3 Upper designed for maximum support for the ankle.
- 4 Bellows tongue to keep debris out.
- 5 External midfoot support.
- 6 Double layer strengthening.
- 7 Full forefoot support integrated with the lacing system.
- 8 Multi-directional tread lightweight rubber sole.

Upper:

- 1.6 - 1.8mm top grade suede, which is soft and flexible yet tough and long lasting, and in main stress areas double layered for extra protection and durability.
- Invista Cordura® mesh areas. A tough and tightly woven mesh which is lightweight and keeps the dirt out. Battle-tested and proven, it is rugged and comfortable.
- Cordura® bellows tongue to prevent debris entering the boot and irritating the foot.
- Designed to give the foot the best support possible thanks to its structural frame engulfing the foot towards the lacing system.
- Asymmetric flex point design to allow easy flexing between the toes and the foot as it follows the natural form of the foot, and will increase the life span of the boot compared to regular boots.
- Double row stitching throughout for extra strength.
- Dual medial air vents.

Lining:

- Fully lined with Cambrelle®, the worlds leading footwear lining. A durable, moisture management product that will keep your feet dry and cool.

Internal:

- Advansa Thermolite® climate control interior for constant temperature regulation in all conditions and is ultra lightweight, or Coolmax® to keep your feet cooler in hot climates.
- Anatomical moulded lightweight footbed for maximum comfort. Which is also removable to aid swift drying.
- 3 different density EVA's (Ethylene-Vinyl Acetate) underfoot for excellent cushioning, shock absorption and responsiveness.
- Strobel construction for a lightweight, solid and secure product.
- Anti-microbial treated lining and footbed to protect the foot from bacterial growth and infection.

Outsole:

- Durable one piece vulcanized rubber cup outsole with full 360° cementation to the upper.
- Multi-directional tread pattern for exceptional traction and grip in all conditions, which ever direction the foot is moving.
- Angled tread for quick release of dirt.
- Oil and slip resistant.
- Treaded waist with pronounced heel for ladders.

Boot weight: 600gms per UK 8.
