

Attach and Secure Ltd is represented in North America by Defense Optics Group Corporation and is one of the world's leading and oldest designers and manufacturers of lanyards, kill-cords and other secure-cords.

We have over 30 years' experience of making products used in the most challenging environments and climates.

Wherever customers have required irreplaceable, valuable or life-saving equipment to be safely attached, we have been able to custom-make products.

Our origins lie in the design and provision of the Lagan Lanyard which was developed in Northern Ireland for police use in the 1980s.

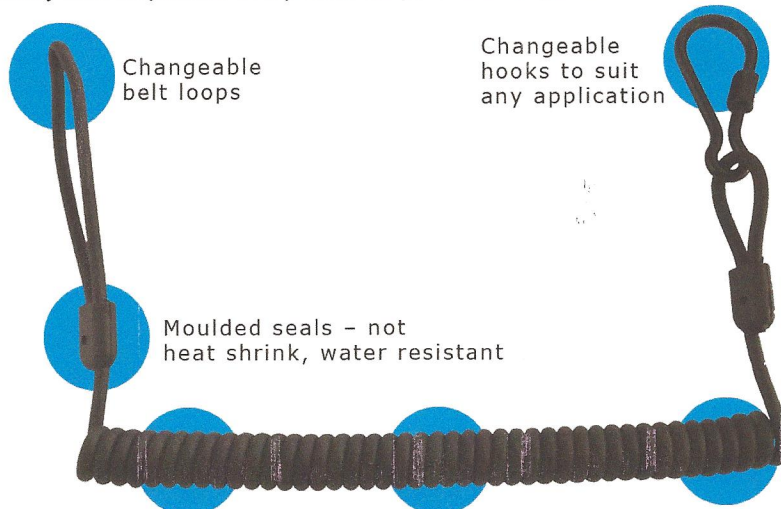

If an item that needs securing is of significant value, it makes no sense to use a generic or plastic product to achieve this objective.

A valuable, high quality item deserves a lanyard of similar virtues.

We can make custom made lanyards of any quantity for any item of value.

The Product

- The Lagan Lanyard was originally designed to prevent weapon loss, and is now widely used by Police, Para-Military, Military, Prison Services and Special Forces around the world
- It is NATO codified, having been operationally proven in all climates and seen service in the Falklands, Iraq, Afghanistan and Bosnia
- We have perfected a basic design and composition, using the knowledge gained from the usage of our products in extreme and challenging environments
- We are able to design lanyards, secure cords and kill-cords for any product
- We pride ourselves on making bespoke, durable products of a quality that far surpasses the 'off-the shelf' cheap plastic products that are commonly available
- Our core design has numerous features that combine to provide a vast level of product integrity and reliability that surpasses every other lanyard currently available

Changeable belt loops

Changeable hooks to suit any application

Moulded seals - not heat shrink, water resistant

Cut resistant Braided Kevlar - unparalleled breaking strength as opposed to wire, no kinking

Memory - coil will always return to the original shape: even in extreme climates (hot or cold)

UV stable - plastic does not corrode or expire

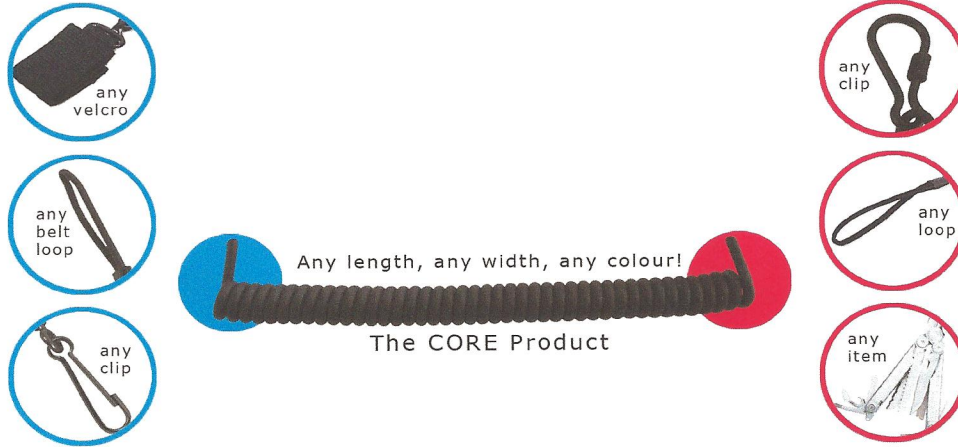

Enforcement Grade Equipment

Custom Made

We use the core Coiled Lanyard design as a basis for our custom-made products, which can be attached to any item, as follows:

Applications

The Lagan Lanyard has an NSN (4020-99-568-5641) and can be used for many applications as shown below:

Examples of recent projects include the following:

Tactical Pistol Lanyard

Our client wanted the reliability of our coiled lanyard combined with the ability to fit a range of handguns. We produced a knotted, moulded, lanyard with interchangeable gun attachments.

Outboard Motor Kill-cord

A customer required an engine kill-cord that could be used with any outboard motor. We were able to design a version that combined a range of attachments with moulded seals that remains durable in both sunlight and water.
