

## ResQhook

### The knife that saves lives

The ResQHook has seen service in many theatres, from the graphic reality of attempted suicide to saving lives at sea and the brutality of a war zone. When speed, efficiency and safety are crucial some of the world's elite reach for the ResQHook. The ResQHook is standard equipment with British Special Forces, Her Majesty's Prison Service, the NHS and installed on every RNLI Lifeboat around the British coast. Available in Red, Black and Green handles for differing applications and stainless or anodized blade finish.

The ResQHook is certified to medical directives HTM2030. It is classified as a medical tool and has an NSN. It has no outside sharp edge, this helps keep police, corrections and rescue personnel safe while the forged steel blade cuts quickly through clothing, seatbelts, ligatures, wetsuits and more.
