Victory Breaching Door Series

What separates us from the competition?

- Fully Welded, All Steel construction designed to withstand thousands of breaches and years of abuse. Our demo door has seen over 8000 breaches and counting!
- UHMWP Ram pads designed to absorb impact force of rams and not cause any damage. This material will stop 00 buck at 12 feet!
- Extremely low training cost. Requires NO proprietary inserts or pins, only 3/4" Poplar dowels and 1/2" plywood inserts that are available at any hardware store.
- No need to buy a door for each entry method, our doors can be equipped to handle 4+ scenarios in one affordably priced unit!
- Can be configured to meet your needs. Available in freestanding design for flexibility at training locations or for permanent mounting in shoot house!

Weight: Approximately 375 lbs.

VICTORY MODEL 3 BREACH DOOR

*Our Triple Threat Breaching Door is one of four revolutionary new Breaching Doors in the Victory Breaching Door Series. The Triple Threat Breaching Door combines 4 specialized training options. 1, the operator sets a Halligan Tool to pry open the outside security door. 2, the operator can use a shotgun to breach the dead bolt or Hinge mechanisms on the main entry door. 3, the operator can use a battering ram to breach the main door. 4. the operator can utilize a Halligan or Jam type hydraulic to open main door . All 4 techniques can be practiced individually or in sequence, providing the most realistic breaching training possible. This multi-use Breaching door has 3 mounting options: free standing, permanently mounted or bolted to a hard surface, or staked to the ground. Our unique features allow realistic shotgun angles 45/45 to be practiced!***ALSO, ask about our TACTech coating. This proprietary coating will extend the life of your breaching door by 1000s of breaches over an uncoated door!*
